

Alameda County Employees' Retirement Association
BOARD OF RETIREMENT

INVESTMENT COMMITTEE/BOARD MEETING

ACERA MISSION:

To provide ACERA members and employers with flexible, cost-effective, participant-oriented benefits through prudent investment management and superior member services.

**Wednesday February 4, 2026
10:30 a.m.**

| LOCATION AND TELECONFERENCE | | COMMITTEE MEMBERS | |
|--|--|--|--------------------------------------|
| ACERA C.G. "BUD" QUIST BOARD ROOM 475 14TH STREET, 10TH FLOOR OAKLAND, CALIFORNIA 94612-1900 MAIN LINE: 510.628.3000 FAX: 510.268.9574 The public can observe the meeting and offer public comment by using the below Webinar ID and Passcode after clicking on the below link or calling the below call-in number. Link: https://zoom.us/join Call-In: 1 (669) 900-6833 US Webinar ID: 879 6337 8479 Passcode: 699406 For help joining a Zoom meeting, see: https://support.zoom.us/hc/en-us/articles/201362193 | | TARRELL GAMBLE CHAIR | APPOINTED |
| | | | |
| | | STEVEN WILKINSON VICE CHAIR | APPOINTED |
| | | | |
| | | OPHELIA BASGAL | APPOINTED |
| | | | |
| | | KEITH CARSON | APPOINTED |
| | | | |
| | | ROSS CLIPPINGER | ELECTED SAFETY |
| | | | |
| | | SCOTT FORD | ELECTED GENERAL |
| | | | |
| | | HENRY LEVY | TREASURER |
| | | | |
| | | ELIZABETH ROGERS | ELECTED RETIRED |
| | | | |
| | | KELLIE SIMON | ELECTED GENERAL |
| | | | |
| | | KATHY FOSTER | ALTERNATE RETIRED¹ |
| | | | |

¹ The Alternate Retired Member votes in the absence of the Elected Retired Member, or, if the Elected Retired Member is present, then votes if both Elected General members, or the Safety Member and an Elected General member, are absent.

Note regarding accommodations: If you require a reasonable modification or accommodation for a disability, please contact ACERA between 9:00 a.m. and 5:00 p.m. at least 72 hours before the meeting at accommodation@acera.org or at 510-628-3000.

Public comments are limited to four (4) minutes per person in total. The order of items on the agenda is subject to change without notice.

Board and Committee agendas and minutes and all documents distributed to the Board or a Committee in connection with a public meeting (unless exempt from disclosure) are posted online at www.acera.org and also may be inspected at 475 14th Street, 10th Floor, Oakland, CA 94612-1916.

INVESTMENT COMMITTEE/BOARD MEETING

NOTICE and AGENDA Wednesday, February 4, 2026

Call to Order: 10:30 a.m.

Roll Call

Public Input (The Chair allows public input on each agenda item at the time the item is discussed)

Action Items: Matters for discussion and possible motion by the Committee

There are no action items.

Information Items: These items are not presented for Committee action but consist of status updates and cyclical reports

1. 2026 Capital Market Assumptions

10:35 – 11:05 Sam Austin, NEPC
Betty Tse, ACERA

2. Education Session: Total Portfolio Approach

11:05 – 11:35 Sam Austin, NEPC
Emily Moran, NEPC
Stephen Quirk, ACERA
Betty Tse, ACERA

3. Education Session: Asset Overlay and Cash Equitization

11:35 – 12:05 Macki Anderson, Parametric
Dan Ryan, Parametric
Emily Moran, NEPC
Stephen Quirk, ACERA
Betty Tse, ACERA

4. Education Session: Affordable Housing – Real Estate Investments

12:05 – 12:35 Margaret Anadu, The Vistria Group
Aaron Quach, Callan LLC
Avery Robinson, Callan LLC
John Ta, ACERA
Betty Tse, ACERA

INVESTMENT COMMITTEE/BOARD MEETING

NOTICE and AGENDA Wednesday, February 4, 2026

5. Report on Real Assets Investment Made Under Delegated Authority after Distribution of the Last Investment Committee Meeting Agenda – Blackstone Infrastructure Partners, LP (\$40 million)³

12:35 – 12:45

Sam Austin, NEPC
Rose Dean, NEPC
Clint Kuboyama, ACERA
Betty Tse, ACERA

6. Report on Private Credit Investment Made Under Delegated Authority after Distribution of the Last Investment Committee Meeting Agenda – Strategic Value Special Situations VI (\$45 million)³

12:45 – 12:55

Sam Austin, NEPC
Rose Dean, NEPC
Clint Kuboyama, ACERA
Betty Tse, ACERA

7. Oral Status Update on Clearwater Onboarding

12:55 – 1:05

Serafin Lim, ACERA
Betty Tse, ACERA

8. Investment Committee Meeting WorkPlan for 2026

1:05 – 1:15

Agnes Ducanes, ACERA
Betty Tse, ACERA

Trustee Remarks

Future Discussion Items

None

Establishment of Next Meeting Date

March 4, 2026, at 10:30 a.m.

³ Written materials and investment recommendations from the consultants, fund managers and ACERA Investment Staff relating to this alternative investment are exempt from public disclosure pursuant to CA Gov. Code §7928.710 and §7922.000.

2026 CAPITAL MARKET ASSUMPTIONS

ALAMEDA COUNTY EMPLOYEES'
RETIREMENT ASSOCIATION

FEBRUARY 4, 2026

Sam Austin, Partner

ASSET CLASS ASSUMPTIONS

| | |
|----------------------|----|
| ▪ Introduction | 3 |
| ▪ Macroeconomic | 14 |
| ▪ Public Equity | 19 |
| ▪ Fixed Income | 24 |
| ▪ Real Assets | 30 |
| ▪ Alternative Assets | 35 |
| ▪ Appendix | 41 |

INTRODUCTION

ASSET CLASS ASSUMPTIONS

OVERVIEW

- NEPC's capital market assumptions are available each quarter with this release reflecting December 31, 2025 market data
- Global equities posted strong performance in the fourth quarter with EAFE and EM outperforming U.S. markets
- Equities have defied expectations, sustaining high margins and earnings growth, while maintaining above average valuation levels
- The 10-year return outlook for equities is at the lower range compared to history but we remain confident in equity markets long-term
- Fixed income assumptions are mostly flat and generally in-line with long-term expectations while long-term yields remain elevated
- Make use of NEPC's 30-year capital market assumptions for strategic asset allocation modeling and long-term planning

CAPITAL MARKET ASSUMPTION PRINCIPLES

HOW SHOULD RETURN ASSUMPTIONS BE INTERPRETED

- **NEPC return assumptions are meant to reflect a nominal return expectation, net of fees, over a 10-year and 30-year investment horizon**
- **With this in mind, NEPC asset class return assumptions look to include all sources of return that flow to an asset class over time**
 - Each major contributing source of return is a building block in our models
- **NEPC's asset class models are designed to be forward-looking and not to replicate the past, which requires both model scrutiny and iteration**
- **Forecasting asset class returns, requires forward-looking assumptions about building block contributors and how they evolve over time**
- **Developing market trends require scrutiny and time to analyze data and research market shifts to understand whether they are cyclical or structural inputs contributing to an asset class's building blocks**

ASSET CLASS ASSUMPTIONS

DEVELOPMENT

- **Capital market assumptions are published for over 70 core asset classes and over 30 composites**
- **Market data as of 12/31/2025**
- **NEPC proprietary models used to develop return forecasts based on a building block approach**
- **The 10-year return outlook is intended to support strategic asset allocation analysis**
- **30-year return assumptions are used for actuarial inputs and long-term planning**

Asset Allocation Process

1. Finalize list of new asset classes
2. Calculate asset class volatility and correlation assumptions
3. Set model terminal values, growth, and inflation inputs
4. Model data updated at quarter-end
5. Review model outputs and produce asset class return assumptions
6. Assumptions released on the 15th calendar day after quarter-end

ASSET CLASS BUILDING BLOCKS

METHODOLOGY

- **Asset models reflect current and forecasted market data to inform expected returns**
- **Systematic inputs are paired with a long-term trend to terminal values**
- **Model inputs are aggregated to capture key return drivers for each asset class**
- **Building block inputs will differ across asset class categories**

Inflation

Real Growth

Yield

10-YEAR RETURN ASSUMPTION OVERVIEW FOR CORE ASSET CLASSES

| | Asset Class | 12/31/2025 10-Year Return | 12/31/2024 10-Year Return | Delta |
|--------------|--------------------------------------|------------------------------|------------------------------|-------|
| | Cash | 3.8% | 4.1% | -0.3% |
| | U.S. Inflation | 2.5% | 2.6% | -0.1% |
| Equity | U.S. Large-Cap Equity | 4.5% | 5.6% | -1.1% |
| | Non-U.S. Developed Equity | 4.3% | 5.3% | -1.0% |
| | Emerging Market Equity | 5.0% | 8.0% | -3.0% |
| | Global Equity* | 4.8% | 6.1% | -1.3% |
| | Private Equity* | 8.2% | 8.5% | -0.3% |
| Fixed Income | U.S. Treasury Bond | 4.4% | 4.7% | -0.3% |
| | U.S. Municipal Bond | 3.8% | 3.8% | - |
| | U.S. Aggregate Bond* | 4.8% | 5.0% | -0.2% |
| | U.S. TIPS | 4.6% | 4.9% | -0.3% |
| | U.S. High Yield Corporate Bond | 6.0% | 6.3% | -0.3% |
| | Private Debt* | 8.1% | 8.3% | -0.2% |
| Real Assets | Commodity Futures | 3.2% | 4.4% | -1.2% |
| | REIT | 5.9% | 5.3% | +0.6% |
| | Gold | 3.1% | 4.7% | -1.6% |
| | Real Estate - Core | 5.5% | 5.9% | -0.4% |
| | Private Real Assets - Infrastructure | 5.4% | 6.0% | -0.6% |
| Multi-Asset | 60% S&P 500 & 40% U.S. Aggregate | 4.9% | 5.7% | -0.8% |
| | 60% MSCI ACWI & 40% U.S. Agg. | 5.1% | 6.0% | -0.9% |
| | Absolute Return* | 5.9% | 6.4% | -0.5% |

*Calculated as a blend of other asset classes. NEPC's capital market assumptions reflect proprietary forecasts for expected returns, volatility, and correlations. Return expectations may differ from an investor's realized returns after accounting for fees, taxes, or other aspects that can influence actual returns. Return forecasts and methodology are reviewed on an ongoing basis and are subject to change over time.

30-YEAR RETURN ASSUMPTION OVERVIEW FOR CORE ASSET CLASSES

| | Asset Class | 12/31/2025 30-Year Return | 12/31/2024 30-Year Return | Delta |
|--------------|--------------------------------------|------------------------------|------------------------------|-------|
| | Cash | 3.5% | 3.6% | -0.1% |
| | U.S. Inflation | 2.7% | 2.7% | - |
| Equity | U.S. Large-Cap Equity | 6.7% | 7.1% | -0.4% |
| | Non-U.S. Developed Equity | 6.5% | 6.7% | -0.2% |
| | Emerging Market Equity | 7.9% | 9.1% | -1.2% |
| | Global Equity* | 7.1% | 7.5% | -0.4% |
| | Private Equity* | 9.9% | 10.5% | -0.6% |

ACERA RETURN AND RISK EXPECTATIONS

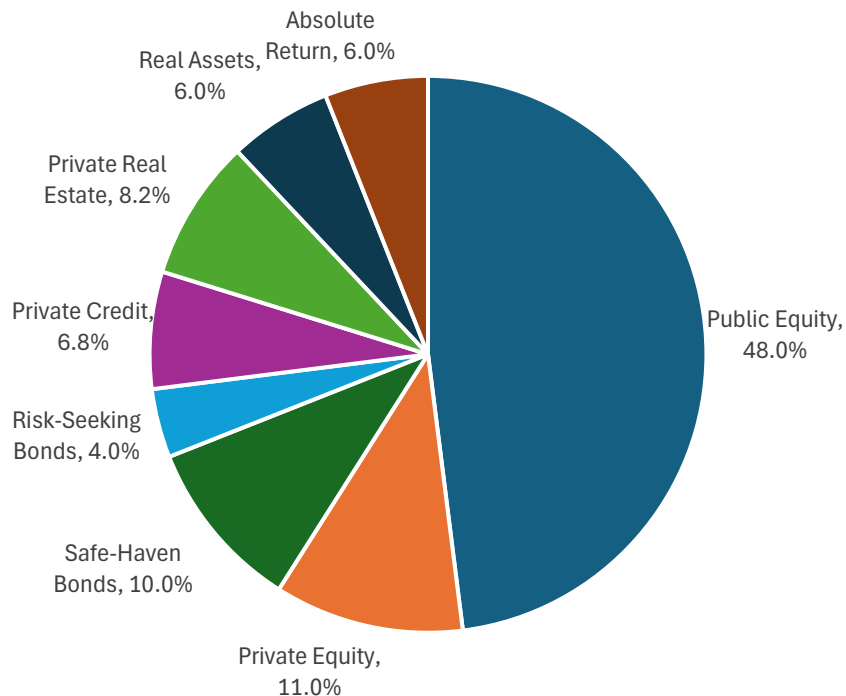

| | 10 Year | | 30 Year | |
|----------------------------|------------|------------|------------|------------|
| | 12/31/2024 | 12/31/2025 | 12/31/2024 | 12/31/2025 |
| Expected Return | 6.8% | 6.0% | 8.0% | 7.6% |
| Expected Volatility | 14.0% | 14.4% | 14.0% | 14.4% |
| Sharpe Ratio | 0.19 | 0.16 | 0.31 | 0.29 |

| Probabilities using December 31, 2025 Assumptions | |
|---|-------|
| Probability of 1-Year Return Under 0.00% | 33.7% |
| Probability of 10 Year Return Under 0.00% | 9.2% |
| Probability of 10 Year Return Under 7.00% | 58.4% |
| Probability of 30-Year Return Under 7.00% | 40.3% |

Expectations are based on NEPC's capital market assumptions as of 12/31/24 and 12/31/25 using ACERA's target asset allocation as of 1/1/25.

ACERA CAPITAL VERSUS RISK ALLOCATION

Capital Allocation

Risk Allocation

MACROECONOMIC

U.S. INFLATION ASSUMPTIONS

OVERVIEW

- Inflation is a key building block to develop asset class assumptions
- Inflation assumptions are model-driven and informed by multiple inputs for both the U.S. and global assets
- NEPC's inflation assumption forecasts near-term paths for major Consumer Price Index (CPI) components including food, energy, core services, and shelter costs
 - CPI is expected to converge with breakeven inflation forecast over the long-term
- The composite inflation assumption reflects a blend of NEPC's inflation forecast and market-implied breakeven inflation rates

| U.S. Inflation Assumption | | |
|---------------------------|---------|-----------------|
| Time Horizon | Current | 12-Month Change |
| 10-Year | 2.5% | -0.1% |
| 30-Year | 2.7% | — |

GLOBAL INFLATION

HISTORICAL INFLATION

- **Non-U.S. forecasts are guided by IMF forecasts, local consumer and producer price indices, and global interest rate curves**
- **Near-term inflation levels for developed markets are projected to be higher relative to history**
 - Long-term inflation assumptions reflect NEPC's path and central bank targets

U.S. CASH

EXPECTATIONS

- **Cash is a foundational input for all asset class return expectations that reflects forward expectations of inflation and real interest rates**
 - Cash + risk premia is an input for long-term asset class return projections
- **The composite cash assumption is built from a blend of NEPC's cash forecast and market forward pricing of short-term interest rates**

| Time Horizon | Current | 12-Month Change |
|--------------|---------|-----------------|
| 10-Year | 3.8% | -0.3% |
| 30-Year | 3.5% | -0.1% |

Sources: Bloomberg, FactSet, NEPC

GLOBAL INTEREST RATES EXPECTATIONS

- **NEPC's outlook on U.S. interest rates has remained consistent over the past few years, generally above market expectations**
- **As interest rate expectations shift lower, the return outlook for base interest rates gradually decline**
- **The outlook has continually improved for non-U.S. developed markets given a narrowing nominal yield differential relative to the U.S.**
 - Differing regional growth and inflation conditions have led to diverging central bank actions

Return forecasts and methodology are reviewed on an ongoing basis and are subject to change over time. Source: NEPC

PUBLIC EQUITY

REAL EARNINGS GROWTH

- **U.S. equities benefit from higher sales growth forecasts, reflecting the impact of a resilient U.S. consumer**
 - U.S. large cap companies also have global revenue exposure that benefits from global growth rates
- **Cyclically-high profit margin levels temper real earnings growth forecasts given expectations for normalization**
 - Profit margin assumptions reflect a shrinking path towards long-term targets that considers both the shift in index composition through time and sustainability of such margins

Expected 5-Year Real Growth

Profit Margins Relative Median

Note: *Small cap indices margins based on EBITDA margins
Sources: S&P, Russell, MSCI, FactSet, NEPC

PUBLIC EQUITY

VALUATION

- **Valuations can heavily influence short- to medium-term returns, but earnings growth is the main driver of long-term equity returns**
- **Valuations across the equity spectrum remain elevated relative to long-term target levels**
 - U.S. large-cap valuations represent the largest disparity
- **Non-U.S. valuations have recovered after an extended period of perceived U.S. exceptionalism**
 - Non-U.S. return expectations have suffered as a result

FIXED INCOME

CREDIT SPREADS

- **Credit spreads have tightened further below median levels**
 - Lower spread levels weigh on future return expectations given less overall carry return
- **Credit spread assumptions reflect a reversion towards long term medians**
- **Default and recovery rate assumptions are informed by long-term history**

U.S. Corporate OAS by Maturity

Return-Seeking Option Adjusted Spread

FIXED INCOME

GOVERNMENT RATES

- **Government rates price change reflects shifts in interest rates, the yield curve, and roll down**
 - Roll down refers to the price change due to the aging of a bond along the yield curve
- **Yields have fallen across the front end of the U.S. Treasury yield curve over the last quarter while long-term yields have steadied**
- **A normal, upward-sloping yield curve provides optimal return potential for fixed income**

|----------------------------|--|---|----------------------------------|----------------------------|
| Illiquidity Premium | The return expected for assets with illiquidity risk | Asset Class | 12/31/25 10-Yr Return | 12-Month Change |
| | | Commodity Futures | 3.2% | -1.2% |
| Valuation | The change in price of the asset moving to a terminal value or real average level | Midstream Energy | 5.3% | +0.7% |
| | | REIT | 5.9% | +0.6% |
| Inflation | Based on the inflation path as defined by breakeven-inflation rates and NEPC assumptions | Global Infrastructure Equity | 4.7% | -0.7% |
| | | Global Nat Resource Equity | 5.0% | -2.0% |
| Growth | Market-specific real growth based on a weighted-average of country-level revenue exposure and GDP growth | Gold | 3.1% | -1.6% |
| | | Real Estate - Core | 5.5% | -0.4% |
| Real Income | The inflation-adjusted income produced by the asset | Real Estate – Non-Core | 7.2% | -0.4% |
| | | Private Debt - Real Estate | 6.3% | -0.2% |
| | | Private Real Assets - Natural Resources | 7.5% | -0.7% |
| | | Private Real Assets - Infrastructure | 5.4% | -0.6% |

*Calculated as a blend of other asset classes. NEPC's capital market assumptions reflect proprietary forecasts for expected returns, volatility, and correlations. Return expectations may differ from an investor's realized returns after accounting for fees, taxes, or other aspects that can influence actual returns. Return forecasts and methodology are reviewed on an ongoing basis and are subject to change over time. Source: NEPC

REAL ASSET

REAL INCOME

- **Equity: Real income is inflation-adjusted dividend yield**
 - Includes public infrastructure, REITS, midstream energy, and natural resource equity
- **Real Estate: Real income is net operating income (NOI)**
 - NOI growth tracks the business cycle and economic regimes
- **Commodity Futures: Real income reflects collateral return and the futures roll yield**
 - Collateral is based on a cash proxy over the time horizon and has increased in-line with cash rates

Commodities Rolling 10-Year Returns

Real Asset Yields

| | 12/31/25 | 12/31/24 |
|----------------------------------|----------|----------|
| Midstream Energy | 4.8% | 4.7% |
| Real Estate - Core | 4.7% | 4.8% |
| U.S. REITs | 4.4% | 4.3% |
| Global Infrastructure Equities | 3.4% | 3.7% |
| Natural Resource Equities | 3.0% | 3.8% |
| U.S. 10-Year Breakeven Inflation | 2.2% | 2.3% |
| Commodity Index Roll Yield* | -1.6% | -0.9% |

REAL ASSET VALUATION

- **Commodity valuation inputs reflect the long-term average of spot prices**
 - Precious metals are trading at a premium to long-term averages given substantial momentum in gold and silver prices
- **Valuation assumptions for other real assets are based on asset-specific valuation inputs**
 - Capitalization rates are used for core real estate, price-to-earnings for global infrastructure and global natural resources equity

Discount/Premium to 10-Year Real Average

Real Price of Gold

Note: Real price of gold reflects inflation-adjusted price of gold, i.e. price of gold in today's dollars

TOTAL PORTFOLIO APPROACH

ALAMEDA COUNTY EMPLOYEES'
RETIREMENT ASSOCIATION

FEBRUARY 4, 2026

Sam Austin, Partner
Emily Moran, Senior Consultant

WHAT IS THE TOTAL PORTFOLIO APPROACH?

Definition

A holistic, dynamic investment framework that manages all assets together – public and private – under a single risk and return lens.

“How much do I have allocated to equities?”

“How sensitive is my total portfolio to equity market moves regardless of which asset classes deliver that exposure?”

BACKGROUND

TOTAL PORTFOLIO APPROACH

History & Adoption

- Not a new concept; Began in the mid-2000s in Canada and Asia
- Formalized by the CAIA Association
- Examples of TPA adoption:
 - Future Fund, Australia's sovereign wealth fund
 - CPP Investments, Canada's largest pension fund
 - New Zealand Superannuation Fund, NZ's sovereign pension fund
 - GIC, Singapore's sovereign wealth fund
 - CalPERS, US's largest public pension*

Recent Interest

- Driven by:
 - Market complexity
 - Technological advancements
 - Lessons from recent crises

CORE PRINCIPLES

TOTAL PORTFOLIO APPROACH

GOVERNANCE

A board and investment committee who collectively buy in to investing with a total-portfolio mindset.

CULTURE

Organizational alignment where teams collaborate toward total portfolio objectives, supported by unified incentives and shared accountability.

COMPETITION FOR CAPITAL

Continuous evaluation ensuring every investment represents the best use of capital across all available opportunities.

FACTOR LENS

Portfolio construction based on a common language of risk factor rather than traditional asset class categories.

KEY DIFFERENTIATORS

TOTAL PORTFOLIO APPROACH VS. STRATEGIC ASSET ALLOCATION

| Performance assessed vs. | Benchmarks | Fund goals |
|--|--------------------------------------|---|
| Success measured by: | Relative value added | Total fund return |
| Opportunities for investment defined by: | Asset classes | Contribution to total portfolio outcome |
| Asset allocation determined by a: | Board-centric process | CIO-centric process |
| Portfolio implemented by: | Multiple teams competing for capital | One team collaborating together |

BENEFITS & CHALLENGES

TOTAL PORTFOLIO APPROACH

BENEFITS

- **Better alignment to organizational goals**
- **Improved risk control**
- **Agility**
- **Governance clarity**

CHALLENGES

- **Resource intensive**
- **Board role**
- **Transition complexity**

QUESTIONS?

APPENDIX

NEPC'S PORTFOLIO CONSTRUCTION

TPA CONCEPTS ALREADY EXIST IN OUR PROCESS

Active Portfolio – Capital Allocation

Active Portfolio – Risk Allocation

- **Proprietary Active Risk Budgeting tool used to develop an optimal active portfolio structure**
- **Uses estimates of each strategy's tracking error and correlations between alphas to construct Alpha Risk Budget**
- **Used to size strategies appropriately and understand each strategy's contribution to tracking error, or active risk**

To: Members of the Investment Committee
From: Stephen Quirk, Investment Officer *Stephen Quirk*
Date: February 4, 2026
Subject: Education Session: Asset Overlay and Cash Equitization

Background

In January 2020, the Investment Committee received an education session on asset overlay strategies and portfolio rebalancing, including the use of derivatives to manage cash balances, rebalance asset class exposures, and improve implementation efficiency. In addition to managing market volatility, overlay strategies are increasingly used by institutional investors to support liquidity management and efficient policy implementation without requiring immediate changes to underlying manager portfolios. Staff, NEPC, and Parametric are providing a refresher education session to revisit these concepts and discuss how overlay strategies function within a Total Fund framework. This item is for informational purposes only and does not include a recommendation or request for action.

Discussion

Asset overlay strategies use derivatives such as futures, forwards, or swaps to adjust portfolio exposures without requiring immediate transactions in underlying physical securities. These tools may support several portfolio management objectives:

- Cash equitization: Economically converting temporary operating and transition-related cash balances into market exposure using derivatives, reducing return drag while preserving liquidity and operational flexibility.
- Synthetic rebalancing: Adjusting asset class exposures using derivatives to maintain alignment with policy targets, manage tracking error, and reduce transaction costs while allowing for more efficient physical rebalancing over time.
- Asset allocation implementation: Supporting timely exposure to approved asset classes during manager searches, transitions, or long-settled cash flows, reducing exposure gaps during implementation periods.

The session will also review key considerations and risks, including tracking errors, basis risk, leverage and margin requirements, counterparty exposure, liquidity management, and the importance of strong operational controls and communication protocols. The discussion will also highlight the role of daily monitoring, margin management, custodial integration, and reporting transparency in supporting effective overlay program governance.

Conclusion

This education session is intended to refresh the Committee's understanding of asset overlay and cash equitization strategies and their potential role in managing cash drag, tracking error, and implementation efficiency within a Total Fund context. No changes to ACERA's current investment structure or policies are being proposed as part of this information item.

Futures Instrument Overview

How Do Institutional Investors Use Synthetic Instruments?

Institutional investors often employ synthetic instruments via an overlay program to help them better implement and achieve their policy objectives.

Typical applications include:

- > Cash securitization overlay
- > Rebalancing
- > Liquidity management
- > Transition Events
- > Tactical positioning
- > Completion portfolios
- > Market hedging
- > Currency hedging
- > Liability matching
- > Duration management
- > Leverage
- > Portable Alpha
- > Trend/Diversifying strategies

Utilizing leverage with derivatives carries additional risks including but not limited to: Market Risk - adverse market moves may require the portfolio to be forced to sell additional assets to cover derivative obligations. Leverage Risk - Exposure greater than liquid assets may leave the account in a debit balance after steep declines in the market or losses may be amplified due to market movements. Counterparty Risk - certain derivatives are subject to risks of default or inability of the counterparty to meet their obligations. Please see additional risks in the presentation.

Exchange Traded Futures

Definition

> A futures contract (“future”) is an agreement to buy or sell an underlying asset or index on a specific future date, at a pre-set price.

Characteristics

- > Standardized
- > Regulated
- > Small initial margin relative to exposure amounts
- > Marked to market daily (virtually eliminating market risk)
- > Liquid (on average, more notional dollar volume is traded in S&P 500® Index futures than the average daily volume at the NYSE each day)
- > Efficiently priced with low transaction costs
- > Users may include Money Managers, Fund Sponsors, Index Funds, and Hedgers

Types*

- > U.S. Equity Indices- S&P 500®, S&P 400 Mid Cap, Russell 2000 indices
- > U.S. Government Fixed - Treasury Securities (2, 5, 10, 20 and 30 year), Swap Rates (5, 10 and 30 year)
- > International Equity Indices- MSCI EAFE, Emerging Markets and several foreign country indices
- > International Government Fixed Income - foreign country government contracts
- > Commodities - S&P GSCITM and BCOM-UBSSM indices, numerous individual commodities

*Where a futures contract on a desired index is not available, a synthetic index position may be created using a combination of available futures contracts. The synthetic index will not track the desired index perfectly, a concept known as “tracking error.”

Exchange Traded Futures

Key Attributes

- > Via the purchase of a futures contract, an investor such as ACERA can gain exposure to an index or an underlying reference asset without fully funding the position
- > Short sales can also be established to remove undesired exposure
- > The profit or loss on the futures contract is calculated daily via a mark-to-market process
- > Initial margin is posted; incremental variation margin amounts will be required if there has been a loss due to an adverse market move
- > Most futures positions are cash settled

Margin

INITIAL MARGIN (IM) REQUIREMENT

- Cash and/or securities that must be deposited with the FCM/broker when a futures position is opened
- Initial margin requirements are set by the Exchanges, and FCMs may at their discretion require additional margin
- Requirements are changed periodically based on contract value and recent volatility.

VARIATION MARGIN

- Cash in excess of the initial margin requirement held at the custodial bank account
- Used for daily mark-to-market transfers.

ACCEPTABLE FORMS OF COLLATERAL

- Cash and/or US Treasury securities are often posted at the FCM for initial margin
- Other acceptable forms of collateral include letters of credit, US Govt Agency Debt, MBS, TIPS, STRIPS, Gold, Money Market Funds, Corporate Bonds, Stocks, and ETF's
- A haircut, or percentage deduction, is often applied to collateral with higher market risk, requiring a higher value to be posted

Futures Contracts Utilized by ACERA

Exchange-traded futures are utilized in ACERA's overlay program to add and remove exposure to a variety of asset classes:

Futures contracts currently utilized are as follows:

| Asset Class | Overlay Benchmark Index | Instruments Utilized |
|---------------|-------------------------|--|
| Global Equity | MSCI ACWI IMI | S&P 500 futures, Russell 2000 futures, MSCI EAFE futures, MSCI EM futures, S&P/TSX 60 futures, and Canadian Dollar futures |
| Fixed Income | Bloomberg Treasury | U.S Treasury futures |

- > Contracts are generally rolled quarterly to maintain exposure, however exposure adjustments can be made at any time

► Parametric

ACERA Overlay Program Review

Solving Implementation Challenges with Overlay Solutions

Solutions that Help Mitigate Policy Implementation Challenges

SOLUTION

WHAT IT PROVIDES:

- Eliminates cash drag on operating and manager cash balances
- Improved liquidity and reduced transaction costs
- Increased expected returns

**REBALANCING
OVERLAY**

- Daily monitoring of portfolio allocations and thresholds
- Prompt rebalancing of portfolio exposures
- Reduced transaction costs and tracking error

- Reduction of performance risk through mitigation of exposure gaps
- Added flexibility in manager terminations and new manager searches
- Exposure throughout long-settled redemptions (e.g. hedge fund receivables)

Intended component may not meet benefits listed.

Cash Overlay Benefits – Operational Cash Balances

- > Cash overlay programs allow clients to carry higher operational cash balances without sacrificing market returns, providing the following benefits:
 - > Greater flexibility in how & how frequently to raise cash from managers
 - > Improved liquidity
 - > Administrative efficiency

- > ACERA has carried cash balances of approx. 1.38% since the inception of the overlay program
 - > In years where plan sponsors opt to make a large prepayment, many '37 Act overlay clients will keep those funds in cash, where it is securitized via the overlay until it is spent down or redistributed to other managers
 - > Clients also often raise sufficient cash to cover several months of expected benefit payments, capital calls and other expenses (e.g., 3- or 6-months of cash needs) where it is likewise securitized via the overlay until it is spent down and replenished
 - > This increases the liquidity of the plan while reducing the trading within other manager portfolios, thereby reducing transaction costs, and allows for more efficient cash flow planning and coordination for plan staff

Cash Overlay Benefits – Manager Cash Balances

- > Overlay programs also can securitize the cash balances within individual manager portfolios
 - > ACERA currently securitizes only its operating cash balances
 - > Many of Parametric's overlay clients also securitize the unintentional cash balances within their separately-managed equity portfolios
 - > This eliminates potential cash drag within manager portfolios without infringing on the manager's investment process or their alpha proposition
 - > Parametric observed \$55 million in cash balances across 19 separately managed portfolios as of 12/31/25

Rebalancing Overlay Benefits

- > Rebalancing overlay programs can help clients quickly, cost-effectively and systematically maintain portfolio allocations in line with the plan's strategic asset allocation policy
 - > With daily monitoring of plan exposures relative to policy targets, the overlay program can immediately identify when allocations exceed pre-defined bands
 - > Synthetic rebalancing positions can be implemented quickly to bring the plan back to policy targets, allowing for more patient and efficient physical rebalancing between other manager portfolios
 - > A synthetic rebalancing overlay is viewed by clients as a risk management tool that minimizes deviations from plan policies and reduces tracking error to policy benchmarks
 - > Of Parametric's other '37 Act overlay clients, 78% utilize synthetic rebalancing in addition to cash overlay

ACERA Overlay Program Performance Overview (12/31/2025)

Incremental Gross Gain/Loss (7/20/2021- 12/31/2025)

| FUTURES PERFORMANCE | RETURN AS A % OF TOTAL PORTFOLIO (GROSS) |
|--------------------------|--|
| December | 0.01% |
| QTD | 0.09% |
| YTD | 0.51% |
| INCEPTION (7/20/2021) | 0.11% |

Source: Parametric Date:1/13/2026

Performance is presented gross of advisory fees but reflects the deduction of transaction costs and the reinvestment of dividends and other earnings. The deduction of an advisory fee would reduce an investor's return. Past performance is not indicative of future results. All investments are subject to the risk of loss. See disclosures for additional information.

Cash Overlay Parameters

PROGRAM EXPECTATIONS:

REDUCE CASH DRAG

POTENTIAL PORTFOLIO OUTCOME:

Seeks performance that tracks portfolio benchmarks and potential increased long-term returns.

INCREASED LIQUIDITY

With overlay in place, ACERA can hold more cash in the portfolio without worry of cash drag on performance. Cash raises are less frequent and time consuming.

Parametric monitors fund cash exposure in the ACERA portfolio via a direct link to State Street Bank. The policy mix below has been built collaboratively with ACERA to fit the overall asset allocation.

FUND CASH POLICY MIX

| ASSET CLASS | TARGET % | BENCHMARK INDEX |
|---------------|----------|-----------------------------|
| Global Equity | 79% | MSCI ACWI IMI NET INDEX |
| Fixed Income | 21% | BLOOMBERG US TREASURY INDEX |

Cash Overlay Performance

Cash Overlay will be monitored and aligned with portfolio cash levels daily, minimizing cash drag relative to portfolio benchmarks.

CASH REDUCTION STATISTICS

| AVERAGE ACTUAL CASH | | AVERAGE EFFECTIVE CASH | |
|---------------------|-------|------------------------|-------|
| \$168,753,070 | 1.38% | \$4,615,922 | 0.04% |

Over multiple market cycles Parametric cash overlay seeks to produce positive results when consistently utilized.

CASH OVERLAY FUTURES ONLY RETURN (GROSS)

| | |
|-----------|--------------|
| December | \$1,964,114 |
| QTD | \$11,921,829 |
| YTD | \$66,119,624 |
| INCEPTION | \$61,957,992 |

Source: Parametric Date:1/13/2026

Performance is presented gross of advisory fees but reflects the deduction of transaction costs and the reinvestment of dividends and other earnings. The deduction of an advisory fee would reduce an investor's return. Past performance is not indicative of future results. All investments are subject to the risk of loss. See disclosures for additional information.

► Parametric

Risks

Overlay Solutions: What Are the Risks?

| RISK | DESCRIPTION | HOW PARAMETRIC MITIGATES |
|-----------------------------------|---|--|
| MARKET | Market performs in a way that was not anticipated. For example, cash outperforms capital markets. | Systematic market risk is an inherent part of the Overlay program and can neither be diversified away nor mitigated. Client specific policy guidelines are established to clearly define desired market risk based on client asset allocation targets. |
| COMMUNICATION/ INFORMATION | Overlay index exposures are maintained based on underlying investment values provided by one or more third parties. There are often delays in the receipt of updated information which can lead to exposure imbalance risks. Inadequate communication regarding cash flow moves into and out of fund and manager changes can lead to unwanted asset class exposures and loss. | Parametric establishes communication links with custodial, manager, and other sources to obtain and verify positions and cash flow data as soon as it is available. Suspect data may be researched and staff notified. |
| MARGIN/LIQUIDITY | Potential that the market moves in a manner adverse to the overlay position causing a mark-to-market loss of capital to the fund and a resulting need to raise liquidity or to close positions; this situation could happen at a time when underlying fund or positions are also declining in value. | Parametric strives to be aware of potential collateral and cash requirements to reduce the risk of needing to remove positions. Additional margin requirements are communicated via electronic mail and margin adequacy is available to the client daily. |
| TRACKING ERROR | Futures (synthetic) index returns do not perfectly track benchmark index returns. This divergence between the price behavior of a position or portfolio and the price behavior of a benchmark is tracking error and impacts performance. | Parametric seeks to minimize tracking error by utilizing liquid futures contracts with sufficient daily trading volume and open interest. All derivative contracts will have some tracking error that cannot be mitigated by an overlay manager. |
| LEVERAGE | Creation of market exposure in excess of underlying collateral value may lead to significant capital losses and result in position liquidation. | Parametric obtains daily collateral pool values and adjusts beta overlay positions to maintain the ratio of total exposure to collateral within a pre-defined client determined band. |
| COUNTERPARTY | Counterparty credit risk on OTC trading. Note: Bilateral centrally cleared OTC counterparty risk is similar to the clearing risk of holding futures investments. | Parametric can facilitate the negotiation of ISDA documentation that seeks to reduce the potential credit risk associated with OTC counterparties. Parametric monitors credit ratings and credit default swap spreads for all counterparties used and will inform staff of developments which may negatively impact credit risk. |
| COLLATERAL | The program may experience losses on the underlying designated assets in addition to potential losses on the index market exposure overlaying these assets. | This risk cannot be mitigated by an overlay manager. Parametric discusses the potential for negative performance in the collateral used for the overlay prior to alpha transport applications with client. |

Risk Controlled Process

PROPRIETARY TECHNOLOGY

- ACERA account data is delivered directly into investment management system
- Rigorous systematized data validation occurs
- Generation of custom analytics

INVESTMENT PROFESSIONALS

- Team of 45 professionals supporting the overlay business
- Review of system generated data and confirmation of overlay analytics
- All program adjustments confirmed by system and investment professional validations

COMPREHENSIVE REPORTING

- Transparent and detailed reporting published to client accessible secure portal daily

► Parametric

Appendices

Synthetic Indexing Illustration

Futures or Swaps can provide a return approximately equal to a benchmark index when fully funded.

The above illustrates the basic overlay principle of transforming existing cash exposure (with cash drag) to desired benchmark index exposure.

For illustrative purposes only.

1. Money market interest may vary depending upon the particular Money Market or STIF investment the client is invested in.

Mark-to-Market Mechanics

Futures contracts are marked-to-market each day:

- Each daily gain/loss is settled on a T+1 basis
- Note that the ACERA faces the clearing house, not a separate counterparty on the other side of the trade
- This daily settlement process versus the exchange mitigates counterparty risk
- Parametric manages the daily margin settlement process on behalf of its clients

Margin Example

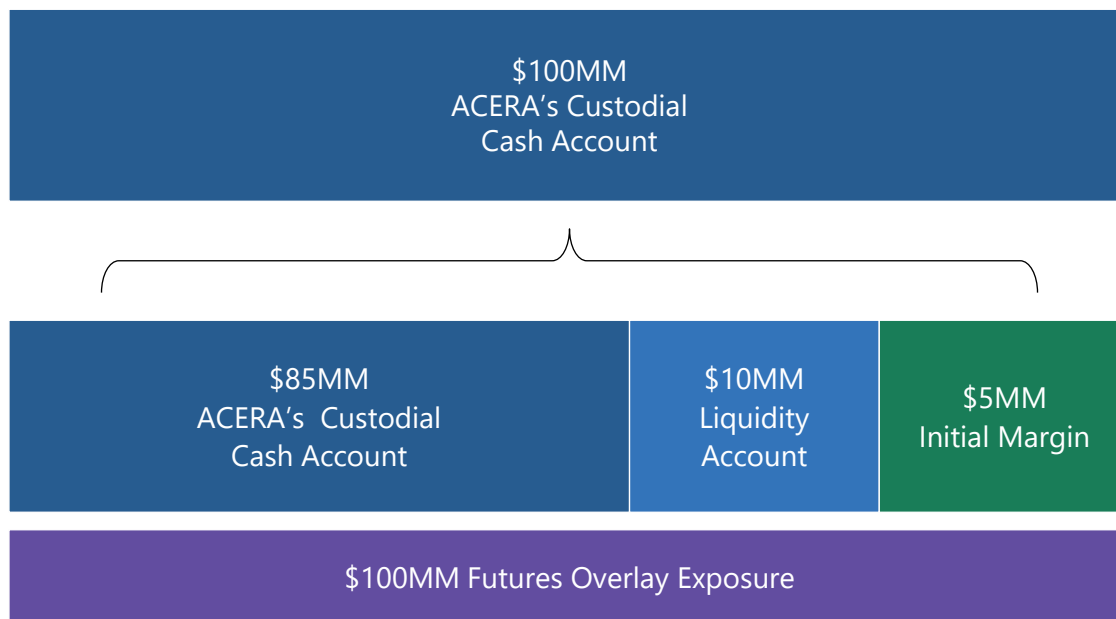

ASSUMPTIONS:

- \$100 Million S&P 500® overlay
- 5% Initial Margin Requirement¹
- 10.0% to Custodial Account

Current Cash Structure: Single Cash Account: \$100 Million Cash

New Cash Structure: Addition of Liquidity Account and Futures Initial Margin from \$100 Million cash

Futures overlay adds market exposure equal to total cash

Overlay via futures mitigates cash drag, while preserving on-demand liquidity

For illustrative purposes only.

1. Initial Margin Requirement % used was based on S&P 500® future initial margin as of 12/7/2022 rounded to nearest whole number. This is detailed further on slide 25.

Changes in Cash Due to Mark-to-market

Base Scenario

\$100MM total cash with Variation Margin (VM) of \$10MM and Futures Initial Margin (IM) of \$5MM

Scenario 1: Market up 5%

Variation Margin (VM) in Parametric account increases by \$5MM

Scenario 2: Market down 5%

Variation Margin (VM) in Parametric account decreases by \$5MM

For illustrative purposes only.

Individual Currency Exposure

1. Please note that only broad market (e.g. versus style) futures are available and/or liquid enough for use. Individuals may not invest directly into indexes.

2. In the case of style asset exposure needs (i.e. small cap growth), Parametric can manage ETF exposures to fulfill client needs. Customized nonstandard indexes can be replicated using swaps. For informational purposes only. This is not an offer to buy or sell securities.

Biographies

Dan Ryan

Executive Director, Client Relationship Management

Dan is responsible for managing client relationships throughout the Western US. Prior to joining Parametric in 2013, Dan was Vice President and Senior Relationship Manager at State Street Global Advisors. He earned a BA in history from the University of Michigan.

Macki Anderson, CFA

Senior Portfolio Manager

Macki is responsible for designing, trading, and managing overlay portfolios. He is also responsible for coordinating with other departments within the organization to enhance business processes, efficiencies, and risk controls to ensure reliability and accuracy of asset data, broker margin information, and asset pricing. He earned a BS in finance from the University of Minnesota. A CFA charterholder, Macki is a member of the CFA Society of Minnesota.

Disclosure

Parametric Portfolio Associates LLC ("Parametric"), headquartered in Seattle, is registered as an investment advisor with the Securities and Exchange Commission under the Investment Advisors Act of 1940.

Parametric is a leading global asset management firm, providing investment strategies and customized exposure management directly to institutional investors and indirectly to individual investors through financial intermediaries. Parametric offers a variety of rules-based investment strategies, including alpha-seeking equity, fixed-income, alternative and options strategies. Parametric also offers implementation services, including customized equity, traditional overlay and centralized portfolio management. Parametric is an affiliate of Morgan Stanley Investment Management, the asset management division of Morgan Stanley, and offers these capabilities through offices located in Seattle, Boston, Minneapolis, New York City, and Westport, Connecticut. This material may not be forwarded or reproduced, in whole or in part, without the written consent of Parametric. Parametric and its affiliates are not responsible for its use by other parties.

This information is intended for informational purposes and details investment strategies and opportunities identified by Parametric. Opinions and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. We believe the information provided here is reliable, but do not warrant its accuracy or completeness. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The views and strategies described may not be suitable for all investors. Past performance is not indicative of future results. Investing entails risks and there can be no assurance that Parametric will achieve profits or avoid incurring losses. Parametric and Morgan Stanley do not provide legal, tax or accounting advice or services. Clients should consult with their own tax or legal advisor prior to entering into any transaction or strategy described herein. Additional information is available on request.

Charts, graphs and other visual presentations and text information were derived from internal, proprietary, and/or service vendor technology sources and/or may have been extracted from other firm data bases. As a result, the tabulation of certain reports may not precisely match other published data. Data may have originated from various sources including, but not limited to, Bloomberg, MSCI/Barra, FactSet, and/or other systems and programs. Parametric makes no representation or endorsement concerning the accuracy or propriety of information received from any other third party.

Benchmark/index information provided is for illustrative purposes only. Investors cannot invest directly in an index. Returns for indexes are calculated gross of management fees. Deviations from the benchmarks provided herein may include but are not limited to factors such as: the purchase of higher risk securities, over/under weighting specific sectors and countries, limitations in market capitalization, company revenue sources, and/or client restrictions. Parametric's proprietary investment process considers factors such as additional guidelines, restrictions, weightings, allocations, market conditions and other investment characteristics. Thus, returns may at times materially differ from the stated benchmark and/or other disciplines and funds provided for comparison.

Performance is presented gross of advisory fees. Advisory fees are deducted quarterly from an investor's portfolio and would impact performance adversely. As an example, assuming (a) \$1,000,000 investment, (b)

portfolio return of 5% per year, and (c) 1.00% annual investment advisory fee, the cumulative fees paid would be \$10,209.57 in the first year, \$55,254.43 over five years, and \$122,351.51 over ten years. Actual fees charged vary by portfolio due to various conditions, including account size. Parametric's investment advisory fees are described further in Part 2A of Form ADV, which is available on request.

Client account performance is preliminary and has not been audited. It is subject to change without notice. Clients are encouraged to review account statements provided by their official custodian and compare them to the performance provided by Parametric. Performance reported by Parametric may vary from custodial statements based on different accounting procedures, reporting dates and valuation methodologies for certain securities.

Tracking error risk refers to the risk that the performance of a client portfolio may not match or correlate to that of the index it attempts to track, either on a daily or aggregate basis. Factors such as fees and trading expenses, client-imposed restrictions, imperfect correlation between the portfolio's investments and the index, changes to the composition of the index, regulatory policies, high portfolio turnover and the use of leverage all contribute to tracking error. Tracking error risk may cause the performance of a client portfolio to be less or more than expected.

Benchmark/index information provided is for illustrative purposes only. It is not possible to invest directly in an index. Indexes are unmanaged and do not reflect the deduction of fees or expenses. Deviations from the index or benchmark(s) provided herein may include, but are not limited to, factors such as: the purchase of higher risk securities, over or underweighting specific sectors and countries, limitations in market capitalization, company revenue sources, or client restrictions. Parametric's proprietary investment process considers factors such as additional guidelines, restrictions, weightings, allocations, market conditions and other investment characteristics. Thus returns may at times materially differ from the benchmark, index or other disciplines provided for comparison.

Derivatives such as futures, swaps, and other investment strategies have certain disadvantages and risks. Futures require the posting of initial and variation margin. Therefore, a portion of risk capital must be preserved for this purpose rather than being allocated to a manager. Liquid futures may not exist for published benchmarks which may result in tracking error. Also, some intra-period mispricing may occur. Swaps require periodic payments, may be less liquid than futures, and may have counterparty/credit risk. Some investment strategies require a cash investment equal to the desired amount of exposure.

AFFORDABLE HOUSING OVERVIEW

FOR INSTITUTIONAL USE ONLY

TODAY'S DISCUSSION

| | |
|--|----|
| Affordable Housing Context | 3 |
| Policy Tools | 6 |
| Bipartisan Support | 7 |
| How It's Built, Financed, and Operated | 8 |
| How It's Profitable | 11 |
| Downside Risk Mitigation | 12 |
| Who Affordable Housing Supports | 13 |

A Large Addressable Market with Limited Institutional Investment

Affordable and workforce (i.e. naturally occurring affordable) housing represent a large and valuable niche in the U.S. housing market that has historically been overlooked by institutional investors. This market is comprised of 24.5 million affordable and workforce units, which represents over half of renter units. This market comprises \$4.0 trillion of asset value, or over 40% of renter-occupied asset value.

Today's shortage of *7.1 million units* of affordable homes in the US is estimated to grow over the next 10 years²

¹ Federal Bank of St. Louis, 2023; Statista, Housing Market in the United States, 2024; US Department of Housing & Urban Development, 2024; US Census Bureau, 2024; JLL's Workforce & Affordable Housing Trends, 2022-2024.

² National Low Income Housing Coalition, The Gap, March 2025.

³ US Department of Housing & Urban Development, 2024; US Census Bureau, 2024; JLL's Workforce & Affordable Housing Trends, 2022-2024; National Low Income Housing Coalition, 2023 Preservation Profiles.

Note: Workforce housing includes unrestricted housing that provides naturally occurring affordable housing at various income levels.

A Housing Deficit Buoyed by Macro Tailwinds

We believe that consistently unfulfilled and growing demand for affordable rental housing among all U.S. households – most pressingly, lower- and middle-class Americans – will continue to drive strong fundamentals in this asset class long-term.

2. U.S. Census Bureau, New Residential Construction, Historical Time Series, Housing Units Completed (Privately Owned), 1968 to 2024.

3. Turner Construction Company, Turner Building Cost Index, 2025 Forecast.

4. CoStar, where "Class A/Luxury" represents 4- & 5-star product, and "Workforce" representing 1-, 2-, and 3-star product.

Note: Certain statements herein reflect the subjective views and opinions of Vistria and its personnel. Such statements cannot be independently verified and are subject to change.

A Persistent and Growing Challenge for the U.S.

The Expence of Living is greatly advanc'd in my Absence... Rent of old Houses, and Value of Lands...are trebled in the last Six Years.
 - Benjamin Franklin upon his return to Philadelphia in 1762, after several years away

The trends that have led to the supply/demand mismatch in the affordable housing market show no signs of abating. To the contrary, we believe that absent an unprecedented disruption, historic drivers of excess demand and under-supply will likely persist, and command continued government support to preserve, improve, and produce affordable supply.

Wages in the U.S. have not kept pace with rent increases for decades. From 1985 to 2023, the median rent price in the U.S. escalated by 180%, whereas median income increased by just 63%, fueling demand for affordable rentals and cost-burdening households without access to lower-cost housing options.

The share of rent burdened households in the U.S. has continued to increase, and with it so has the demand for lower-cost, affordable housing. Currently, half of the U.S. renter population – 22.3 million households – is paying more than they can afford on rent, with over half of these households spending over half of their income on housing.

Apart from the challenges that hamper production, almost 750,000 units of federally assisted rental homes are at risk due to affordability restrictions set to expire in the next 10 years, threatening to erode the supply of existing affordable product and further exacerbate the supply/demand imbalance.

1. Median household income is based on U.S. Census Bureau ACS 5-Year Estimates (pre-2010 income from Federal Reserve Bank of St. Louis). Rent data reflect HUD Fair Market Rents (40th-percentile gross rents) by year and metro. All figures shown as medians.

2. Joint Center for Housing Studies of Harvard University, America's Rental Housing, 2024. U.S. Census Bureau's American Community Survey (ACS) 5-Year Estimates, Data Profiles, 2022.

3. Federal Reserve Bank of St. Louis, Economic Research Division, Homeownership Rates by Race and Ethnicity, from 2001 to 2025. Renter rate calculated as 1 minus annual home ownership rate.

4. Public and Affordable Housing and Research Corporation and the National Low Income Housing Coalition, 2021 Picture of Preservation, October 2021.

Note: Rent burdened households spend between 30%-50% of their income on housing, and severely rent burdened households spend over 50% of their income on housing. Certain statements herein reflect the subjective views and opinions of Vistria and its personnel. Such statements cannot be independently verified and are subject to change.

Regulatory Diversification and Bipartisan Support for Affordable Housing

Even as political polarization has risen, funding for federal rental assistance and low-income housing tax credits has increased under every White House Administration this century, including the current Administration

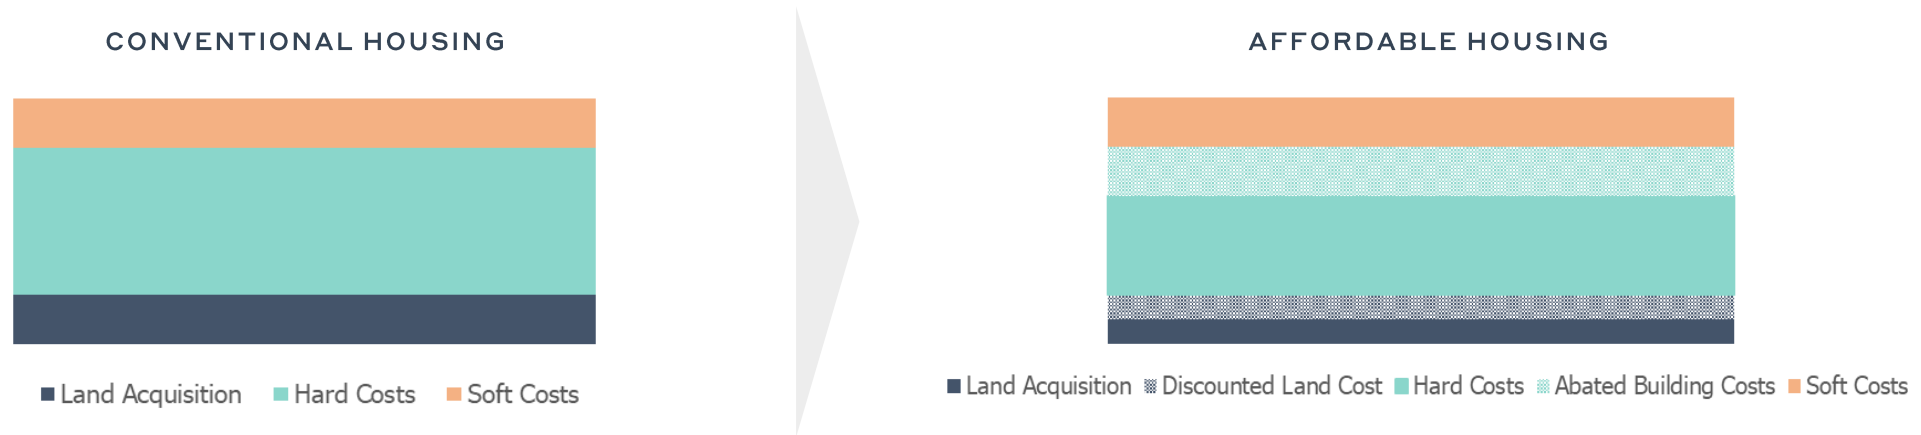

Congress passed a significant LIHTC expansion in July. The HUD budget is expected to be finalized in the coming 1-2 months within a tight range for rental assistance between +5% (Senate proposal from the Summer) and +7.5% (House proposal in January 2026)

The highlighted states, representing nearly 75% of the U.S. population, have robust programs to fund and incentivize affordable housing and represent a diverse set of state and local political environments

Affordable Housing – How It's Built (Uses)

COST SUBSIDIES FOR AFFORDABLE HOUSING

Public and non-profit partners can defray the cost of building affordable housing in many ways, including:

- *Below-market land costs*
- *Tax-abated construction costs (e.g. sales tax exemptions, mortgage recording tax exemptions, etc.)*
- *Cash subsidy*
- *Favorable zoning that maximizes density to create economies of scale and amortize costs across a greater number of units*

Affordable Housing – How It's Financed (Sources)

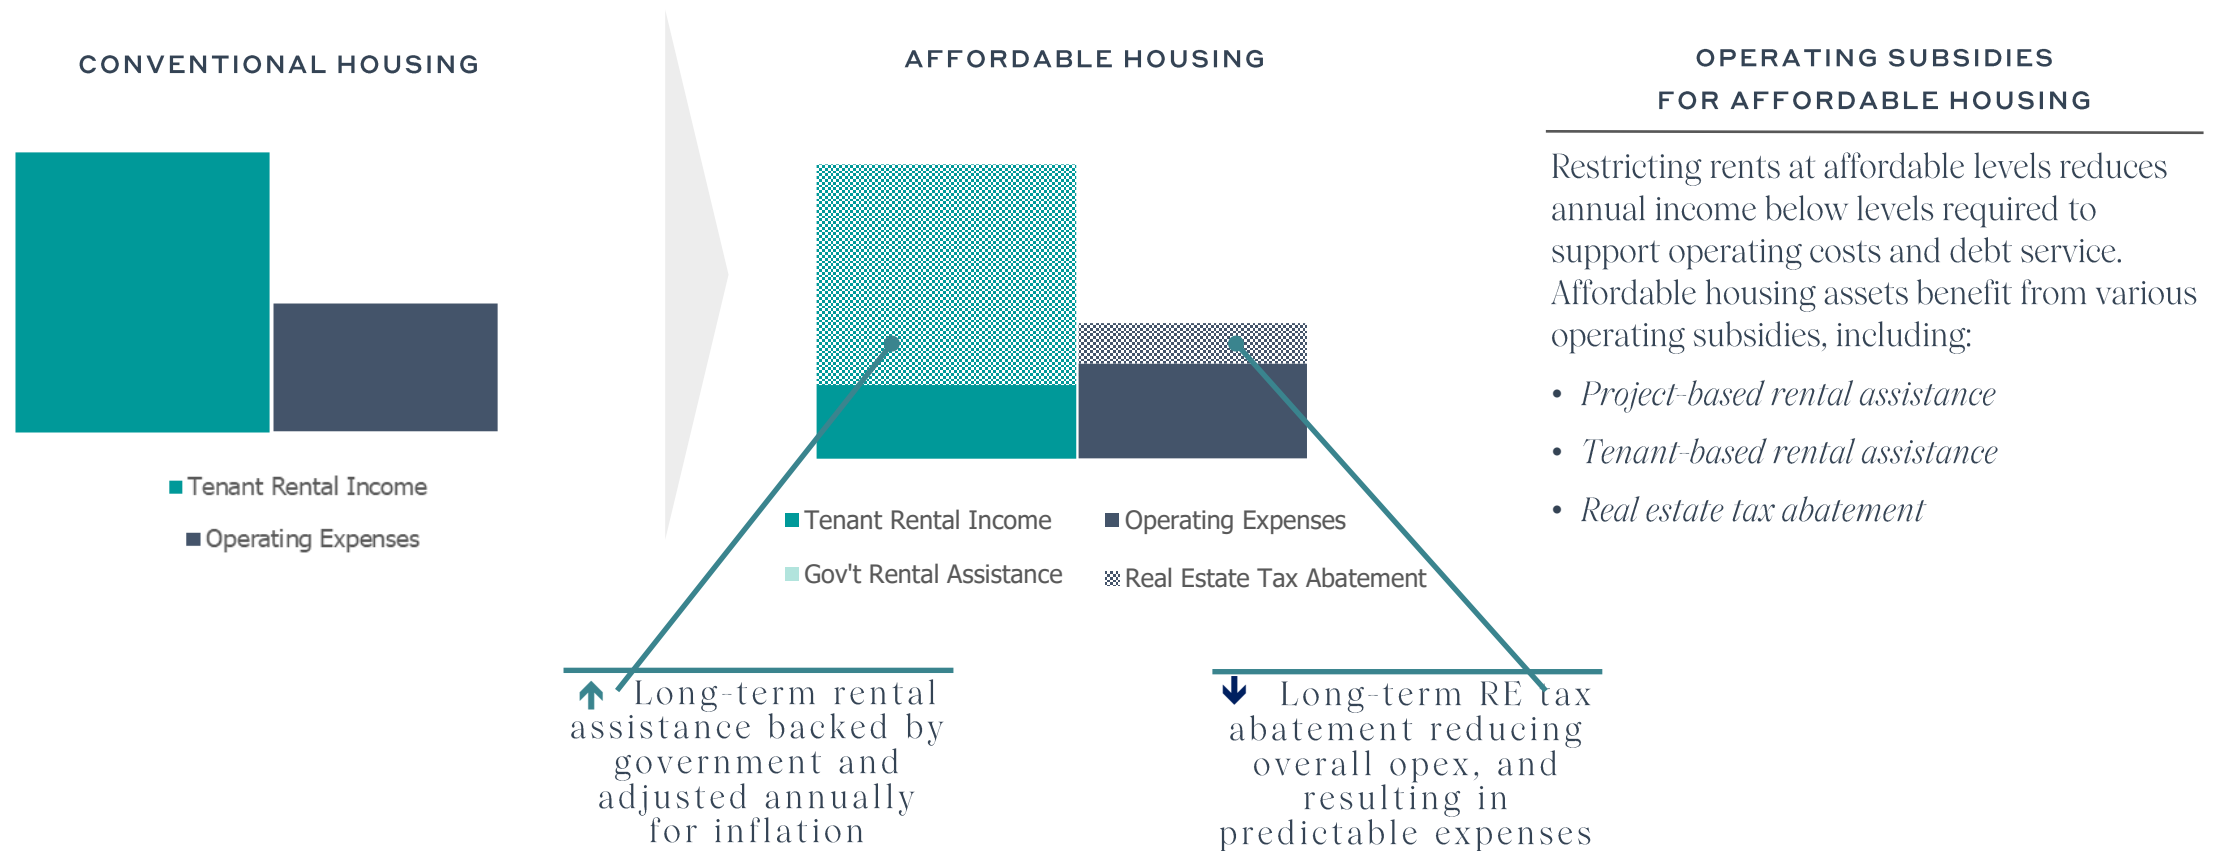

FINANCING SUBSIDIES FOR AFFORDABLE HOUSING

Capital subsidies from public and philanthropic sources help pay for affordable housing in partnership with private capital. Examples of concessionary capital include:

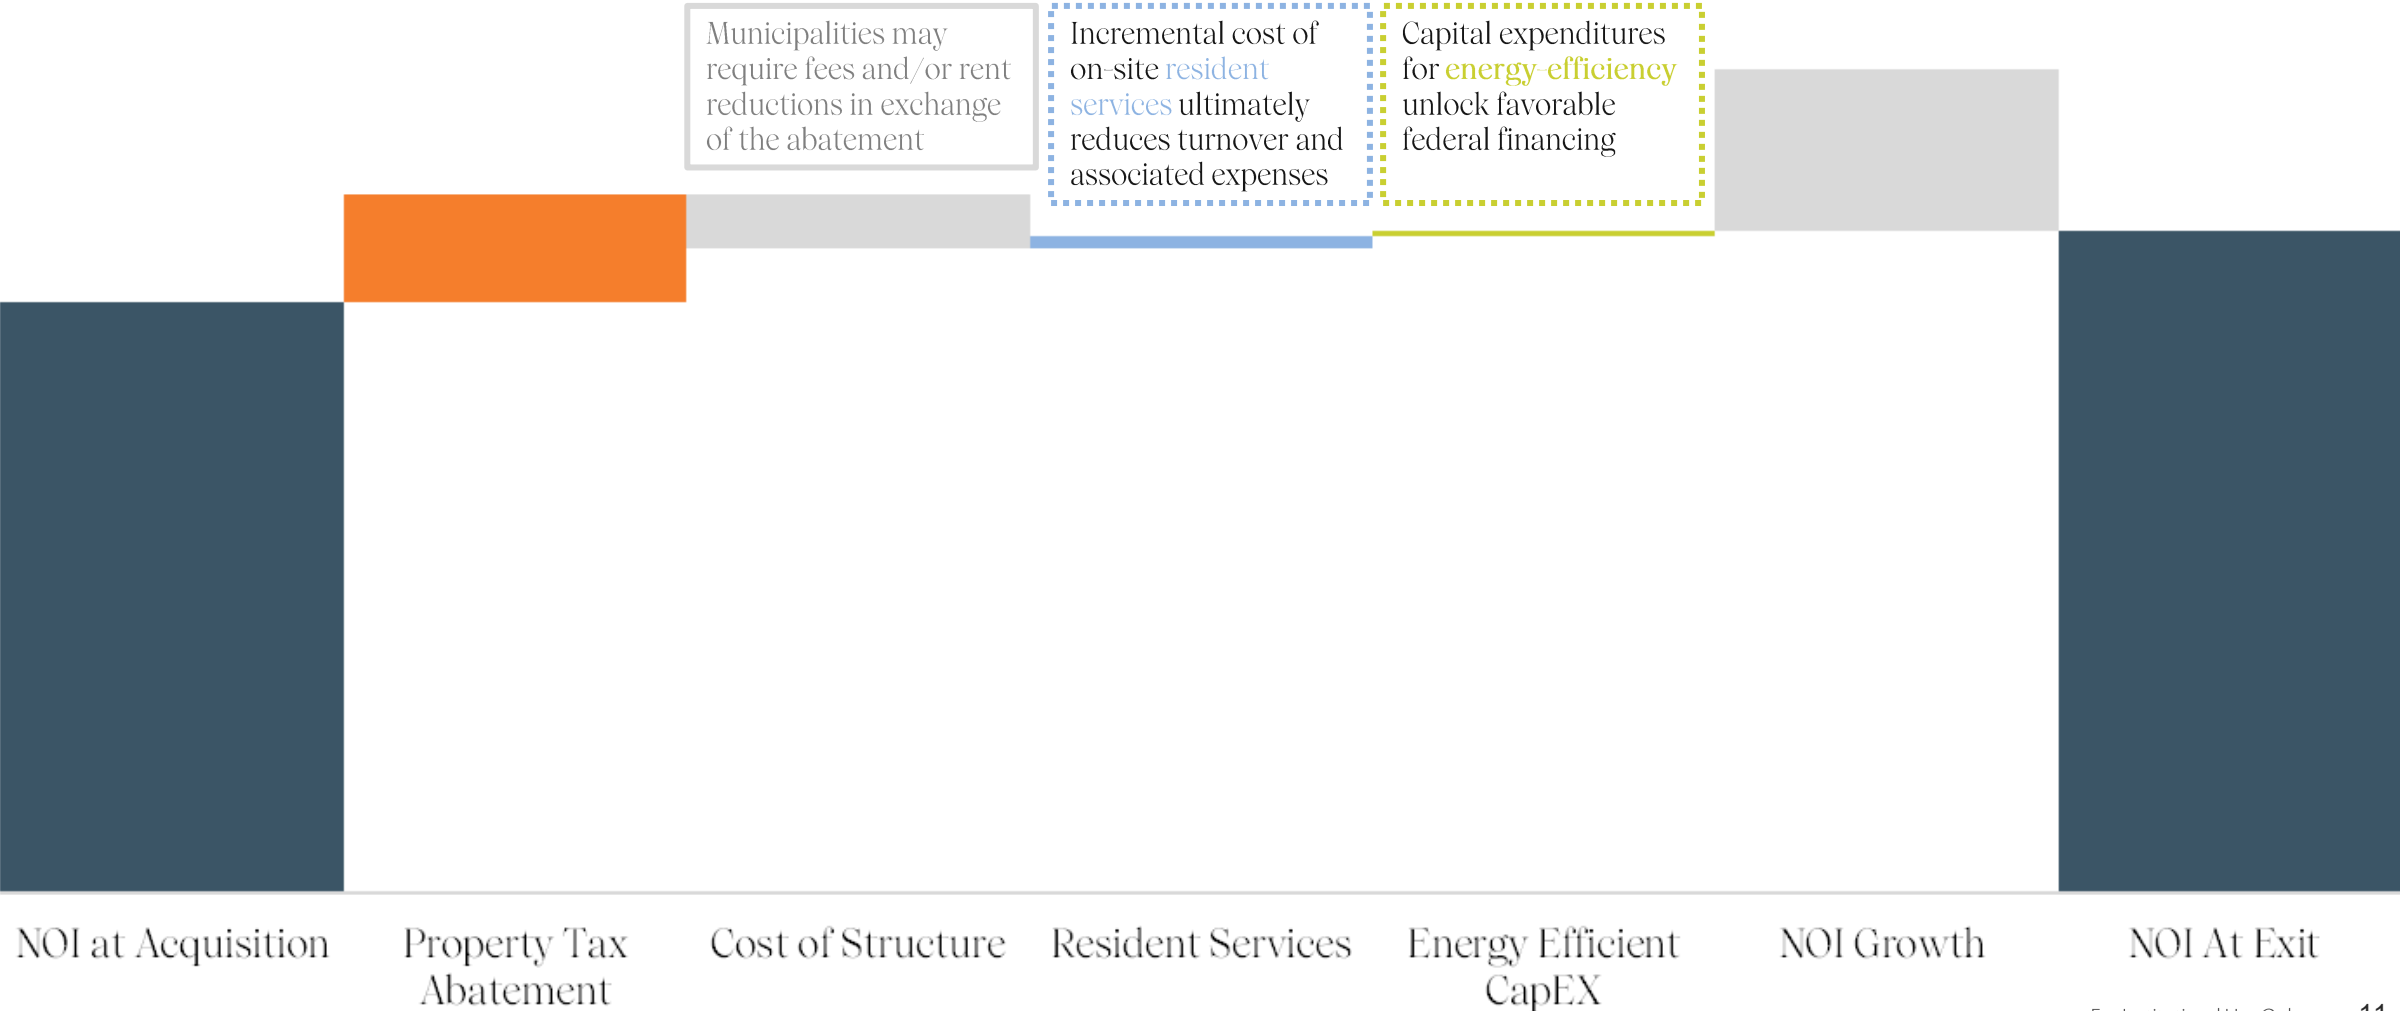

- *Low-income housing tax credit equity ("LIHTC")*
- *Tax-exempt bond financing*
- *Low-cost city/state loans*
- *Favorable GSE federal financing*
- *Subordinate debt*
- *Cash subsidy*

Affordable Housing – How It's Operated

Affordable Housing – How It’s Profitable

Example: Market-Rate to Affordable Conversion

Note: Certain statements herein reflect the subjective views and opinions of Vistria and its personnel. Such statements cannot be independently verified and are subject to change.

Strong Downside Mitigation

| RESILIENCY FACTOR | DESCRIPTION |
|---|--|
| BELOW-MARKET RENTS | Certain affordable housing caters to households paying rents that are significantly below-market, resulting in higher occupancy and lower turnover, and making our renter base less vulnerable to economic shocks and cycles. |
| GOVERNMENT-CONTRACTED REVENUE WITH EMBEDDED INFLATION PROTECTIONS | Certain affordable housing benefits from reliable rental streams through federally funded subsidies including Section 8, a renewable, 20-year contract that provides stability in rental income and protection from volatility in the housing market. Pegged to HUD's definition of fair market value ("FMR"), federally subsidized housing vouchers permit annual rent adjustments to account for inflation, while preserving long-term affordability by capping the tenant's portion of rent at 30-40% of their income, with the federal government contributing the balance. Inflation adjusters for federal contract rents include annual adjustment factors ("AAF") for project-based rental assistance, operating cost adjustment factors ("OCAF") for project-based Section 8, and renewal funding inflation factors ("RFIF") for public housing. |
| LONG-TERM TAX ABATEMENTS | A growing number of municipalities are providing long-term real estate tax exemptions or abatements in exchange for affordable rents for all or a portion of the units in a project, netting more income per unit and mitigating rising real estate tax risk for decades. |
| BI-PARTISAN SUPPORT | Affordable housing programs have benefited from bipartisan action, and the urgency of the affordable housing crisis continues to command bipartisan support today. The LIHTC program was signed into law by President Reagan in 1986 and largely remained intact as control of the House and Senate switched parties, and it will benefit from \$8 billion of additional support introduced and passed by bipartisan lawmakers in July 2022. Moreover, a recent national opinion poll found that most Democrats, Independents and Republicans believe in more government investment in building more affordable units for low-income people, expanding funding for rental assistance, and repairing public housing. ⁶ |
| CONSISTENT ATTRACTIVE FINANCING | Government sponsored entity ("GSE") financing through the Federal Housing Finance Agency ("FHFA") and Fannie Mae and Freddie Mac has gradually expanded its focus on affordable housing, upping the minimum affordable housing requirement from 37.5% of the GSE's overall multifamily lending volume, to 50% as of July 2021. This has resulted in consistently favorable terms and aggressive pricing for affordable projects in an otherwise volatile interest rate environment. |

The Communities Affordable Housing Supports

Affordable housing supports U.S. households from a wide range of socioeconomic backgrounds. Affordable housing¹ constitutes critical social infrastructure for working-class families as well as vulnerable populations in need of additional supports to remain safely and stably housed.²

| ILLUSTRATIVE HOUSEHOLD |  <p>RITA</p> <ul style="list-style-type: none"> • 63 YEARS OLD • RETIRED HOME HEALTH AIDE • \$22,380 ANNUAL INCOME (20% OF AMI) • PAYS \$599 / MONTH IN RENT FOR A 1BR³ |  <p>JALEN</p> <ul style="list-style-type: none"> • 36 YEARS OLD • TRUCK DRIVER WITH ONE CHILD • \$63,950 ANNUAL INCOME (50% OF AMI) • PAYS \$1,498 / MONTH IN RENT FOR A 1BR |  <p>CATHY & MIKE</p> <ul style="list-style-type: none"> • 26 & 28 YEARS OLD • TEACHER AND LAW ENFORCEMENT OFFICER WITH ONE CHILD • \$172,600 ANNUAL INCOME (120% OF AMI) • PAY \$4,315 / MONTH IN RENT FOR A 2BR |

NOTICE TO RECIPIENTS

No interests in the Fund are offered hereby. Any offer to sell or solicitation of an offer to buy Interests will be made solely through definitive offering documents, identified as such, in respect of the Fund. Such definitive offering materials will supersede this Presentation in its entirety.

This Presentation and the information contained herein are confidential and for the use solely of the person to whom this Presentation is addressed. If a prospective investor is not interested in subscribing for Interests, this Presentation should be returned promptly to The Vistria Group, LP (together with its affiliates, "Vistria"), the investment advisor and sponsor of the Fund. The Interests have not been recommended, approved or disapproved by the U.S. Securities and Exchange Commission (the "SEC") or by the securities regulatory authority of any state or of any other U.S. or non-U.S. jurisdiction, nor has the SEC or any such securities regulatory authority passed upon the accuracy or adequacy of this document. Any representation to the contrary is unlawful. The Interests have not been registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), the securities laws of any state of the United States or the securities laws of any other jurisdiction, nor is such registration contemplated. The Interests will be offered and sold under the exemption provided by Section 4(2) of the Securities Act and Rule 506 of Regulation D promulgated thereunder and other exemptions of similar import in the laws of the states and jurisdictions where the offering will be made.

Prior to making any investment decision in respect of the Fund, each investor must undertake its own independent examination and investigation of the Fund, including the merits and risks involved in an investment in the Interests, and must base its investment decision – including a determination whether Interests would be a suitable investment for the investor – on such examination and investigation and must not rely on Vistria in making such investment decision. Prospective investors must not construe the contents of this Presentation as legal, tax, investment, or other advice. Each prospective investor is urged to consult with its own advisors with respect to legal, tax, regulatory, financial, accounting and ERISA consequences of investing in the Fund, the suitability of the investment for such investor and other relevant matters concerning an investment in the Fund. This Presentation contains an overview summary of the terms of the Fund. The summary set forth in this Presentation does not purport to be complete, and is qualified in its entirety by reference to the amended and restated limited partnership agreement of the Fund, as amended from time to time.

This Presentation is to be used by the prospective investor to which it is furnished solely in connection with the consideration of an investment in the Fund. The information contained herein should be treated in a confidential manner and may not be reproduced, distributed or used in whole or in part for any other purpose, nor may it be disclosed without the prior written consent of Vistria. Each investor accepting this presentation hereby agrees to return it promptly upon request. The foregoing will not limit the disclosure of the tax treatment or tax structure of the Fund (or any transactions undertaken by the Fund). As used in this paragraph, the term "tax treatment" refers to the purported or claimed U.S. federal income tax treatment and the term "tax structure" refers to any fact that may be relevant to understanding the purported or claimed U.S. federal income tax treatment, provided that, for the avoidance of doubt, (i) except to the extent otherwise established in published guidance by the U.S. Internal Revenue Service, tax treatment and tax structure will not include the name of or contact information for, or any other similar

identifying information regarding the Fund or any of its investments (including the names of any employees or affiliates thereof) and (ii) nothing in this paragraph will limit the ability of a prospective investor to make any disclosure to such prospective investor's tax advisors or to the U.S. Internal Revenue Service or any other taxing authority.

No person has been authorized in connection herewith to give any information or make any representations other than as contained in this Presentation, as supplemented, modified and amended from time to time, and any representation or information not contained herein may not be relied upon as having been authorized by Vistria, any of its directors, officers, employees, partners, shareholders or affiliates.

None of Vistria, its subsidiaries and affiliates, nor any of their respective directors, officers, employees, agents or advisers (collectively, the "Related Persons") will, to the maximum extent permitted by law, be responsible or liable for this Presentation (or the information contained herein) and none of the Related Persons makes any warranties or representations, express or implied, as to the accuracy, suitability, fairness, completeness or otherwise of such information including where such information contains errors or misstatements. The recipient of this Presentation acknowledges that it is capable of and is making its own independent assessment, without reliance upon this Presentation, based upon such information the recipient considers appropriate, as to the validity of any assumptions, data, results and conclusions contained in this Presentation and the economic, financial regulatory, legal, taxation and accounting implications of those assumptions, data and results, and that the recipient does not rely on any recommendation or statement made by any of the Related Persons. The recipient acknowledges that, to the maximum extent permitted by law, each Related Person excludes and disclaims all liability to the recipient or to any other person for any expense, cost, loss or damage of any kind including direct, indirect or consequential loss or damage incurred by any person arising from or relating to any information included or omitted from this Presentation, whether by reason of such information being inaccurate or incomplete or for any other reason.

Certain information contained herein has been obtained from published and non-published sources prepared by other parties, which in certain cases have not been updated through the date hereof. While such information is believed to be reliable for the purpose used herein, none of Vistria, any of its officers, employees, partners, shareholders or affiliates assume any responsibility for the accuracy of such information, and such information has not been independently verified by Vistria. Except where otherwise indicated herein, the information provided in this Presentation is based on matters as they exist as of the date of preparation and not as of any future date, and will not be updated or otherwise revised to reflect information that subsequently becomes available, or circumstances existing or changes occurring after the date hereof. The delivery of this Presentation does not imply that any other information contained herein is correct as of any time subsequent to the date of this Presentation.

Forward-Looking Statements

Certain information contained in this Presentation constitutes “forward-looking statements,” which can be identified by the use of forward-looking terminology such as “may,” “will,” “should,” “expect,” “anticipate,” “project,” “estimate,” “forecast,” “intend,” “continue,” “target,” or “believe” or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance may differ materially from those reflected or contemplated in such forward-looking statements. Certain statements included in this Presentation cannot be independently verified as they are illustrative and based on Vistria’s opinion. Prospective investors should pay close attention to the assumptions underlying the analyses, forecasts and targets contained herein.

The analyses, forecasts and targets contained in this document are based on assumptions believed to be reasonable in light of the information presently available. Such assumptions (and the resulting analyses, forecasts and targets) may require modification as additional information becomes available and as economic and market developments warrant. Any such modification could be either favorable or adverse. No assurances can be made that any forecasts or targets will materialize. They have been prepared based on Vistria’s current understanding of the energy and credit markets, Vistria’s current view in relation to future events, and various estimations and assumptions made by Vistria, including estimations and assumptions about events that have not occurred, any of which may prove to be incorrect. Therefore, the forecasts and targets are subject to uncertainties, changes (including changes in economic, operational, political or other circumstances) and other risks, including, but not limited to, broad trends in business and finance, legislation and regulation affecting the Fund, monetary and fiscal policies, interest rates, inflation, currency values, market conditions, the availability and cost of short-term or long-term funding and capital, all of which are beyond Vistria’s control and any of which may cause the relevant actual, financial and other results to be materially different from the results expressed or implied by such forecasts and targets. Industry experts may disagree with the forecasts and targets, the estimations and assumptions used in preparing the forecasts and targets or Vistria’s view or understanding. No assurance, representation or warranty is made by any person that any of the forecasts and targets will be achieved and no investor should rely on the forecasts and the targets. None of Vistria, any of its affiliates or any of their respective directors, officers, employees, partners, shareholders, advisors or agents makes any assurance, representation or warranty as to the accuracy of any of the forecasts and targets. Nothing contained in this Presentation may be relied upon as a guarantee, promise, assurance or a representation as to the future.

An investment in Interests in the Fund is subject to substantial risks and uncertainties, including the risk that the investor will lose its entire investment. There can be no assurance that the Fund will return any capital contributed by an investor. See “Important Information” below in this Presentation.

This Presentation was not intended or written to be used, and cannot be used by any taxpayer, for the purpose of avoiding penalties that may be imposed on the taxpayer under U.S. federal tax law. This Presentation was written to support the promotion or marketing of the Fund. Each taxpayer should seek advice based on the taxpayer’s particular circumstances from an independent tax advisor.

The performance and other metrics presented in this presentation reflects information as of December 31, 2025 unless otherwise noted. All information presented is intended for one-on-one discussion purposes with institutional investors only and is confidential.

All properties pictured within this presentation are intended to demonstrate the types of investments that the Fund will seek to make. There can be no assurance that Vistria will be able to implement its investment strategy, achieve its investment objectives, or make similar investments. An investment in the Fund is risky and may result in a loss of the entire investment.
